

FreshVinyl™

Surface Protection Film

Conformable polyvinyl surface protection film with effective antimicrobial.

Perfect for countertops, desk and kiosks, cafeteria tables, door surfaces, handles and hardware; drive-through counters and portals, touch screens, including phones and tablets; ATM's, credit card terminals and much more. Can be safely applied to most hard surfaces. Seamlessly integrates with touch screen fingerprint recognition and touch screen technologies.

Ideal for re-opening and on-going maintenance of public areas and vulnerable surfaces.

Easy to apply! Easy to remove!

Can be safely used in food areas and cleaned easily with quaternary ammonium-based cleaning solutions such as Lysol, Windex and Pure Green.

(Do not use bleach or bleach products on FreshVinyl™)

3.2 Mil thick, Matte Clear and Printable

3" x 150' Roll
5" x 150' Roll
24" x 150' Roll

Antimicrobial Attributes (ISO 22916)

Staphylococcus Aureus	99.9%
Klebsiella Pheunomiae	99.9%
Kecherichia coli (E. Coli)	99.9%
MRSA	99.9%
Salmonella	99.9%
VRE	99.9%
Listeria	99.9%
Pseudomonas	99.9%

Length of protection will depend on use, how much it is touched, cleaned, is the surface outdoors ect. We recommend changing the film at the least, every 14 days. Replacement times will need to be determined by the end user.

Regulations, Certification and Compatibility—
Proposition-65, Consumer Product Safety Improvement Act (CPSIA) and
Registration, Evaluation, Authorization and Restriction of Chemicals
(REACH) and Restriction of Hazardous Substances Directive (RoHS).

Specifications are subject to change. Customer is solely responsible for adhesive and liner compatibility. No warranty, express or implied is extended and liabilities, of any kind, are disclaimed.
